The Didactic Vision of the school St. Goulven of St. Didier

The holistic development of a child is the principal aspect of our vision so that a child can fully live the time of his/her childhood and build a solid foundation.

Therefore, our pedagogical priorities are as follows;

- Working towards to give the value to the learning process to enhance the curiosity and amusement of the children.
- Being tolerant and open towards the ambiguity of the outside world.
- Respect all the different talents.
- Involvement in the social activities to improve civic responsibility.
- Promoting educational decompartmentalization of the classes and the projects to ensure continuity in learning.

The child is made responsible and taught to be respectful;

- towards himself/ herself
- towards others : classmates, staff, teachers, parents
- towards the objects of daily use.
- towards rules and regulations.

The school follows a culture wherein an awakening towards faith is taught while being considerate about the liberty and the progress of everyone. However, it is the unity among everyone that gives the school its strength to accomplish the didactic goals of togetherness, well being and prosperity of the children and the school.

Our international exchange and solidarity vision;

As a part of an educational community, it is important for us to give the children a global exposure so that they grow up to be the citizens who are open-minded and tolerant towards the way of the world. Their involvement in an international project will encourage them to meet people of a different nationality, to acquire the knowledge of another culture, to understand the society of the people coming from a different land, to learn about a different lifestyle and their daily routine.

Therefore, here we are calling out to all the schools of Europe and around the world who would like to work with us towards the accomplishment of our grand endeavours.
